[illegible]

Network configuration management - Patent 2006016819

Often, host nodes in a network will maintain **policy information**. This policy information may include access information that may be used by the client nodes...

Method and apparatus for automatically selecting a node in a ...

The end result is that each **network node** has access to numerous large data A Client Usage Statistics Rollup Client is component of the associated ...

System and method for processing a request for information in a

Content gateway policy manager 20 is a management node in information service. At the client terminal or content gateway 18 may come to access --

Client-server computer network management architecture - US Patent

A client-server network management system includes a plurality of managed ... the user first highlights fd.

Níon sciobáir mairbhín comais chun dae

This permits the client to observe the data statistics as they are ... Using a computing node that has a connection to the internal switch fabric as well ...

Vol. 45, No. 1 - Organic electronics 0018-0547/2001/50 00 © 2001

.. R. S. Rittenhouse, and Y. S. Tan. **Most information access via distributed .. at server and/or client nodes in replicated data environment.** ..
